Social Remittances	
Internally Displaced Persons (IDPs)	
Economic	
Social	

Political	
Advanced Countries (ACs)	
Emerging and Developing Countries (EDCs)	
Low-income developing countries (LIDCs)	
OECD countries	
Economic Globalisation	
Emigration Policy	
Drifting Populations	
Urbanisation	
Brain Drain	

Powers and Borders: Divide a continent!

Your continent!
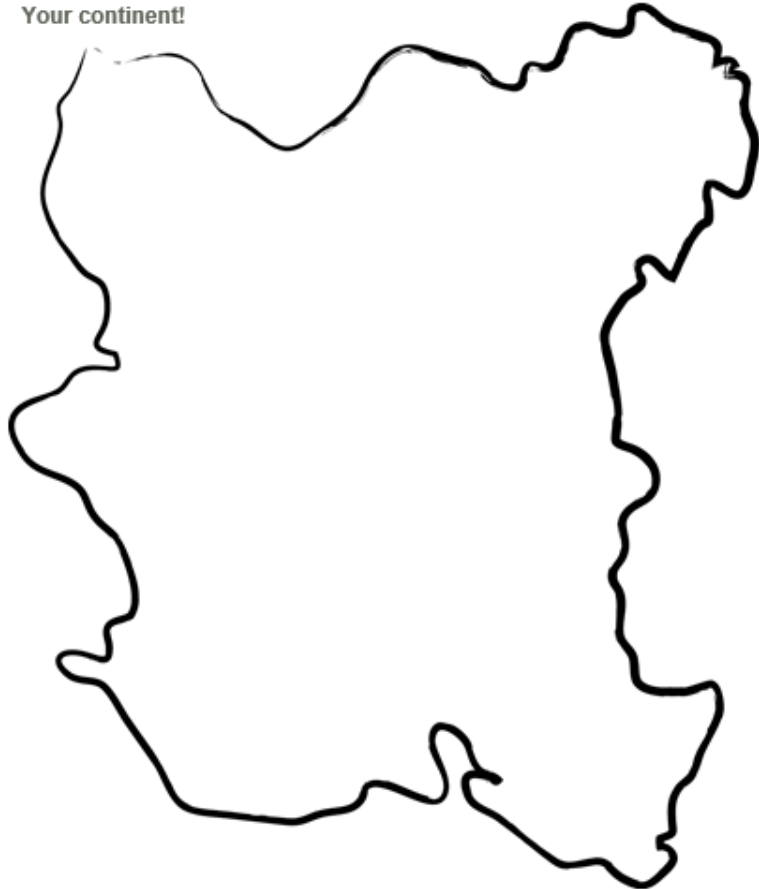

A: Physical Geography

B: Human Geography

Key to maps A and B

Mountains

Desert

Savannah grassland

Rivers

1 2 3 4 Different ethnic groups

N

0   5,000 miles
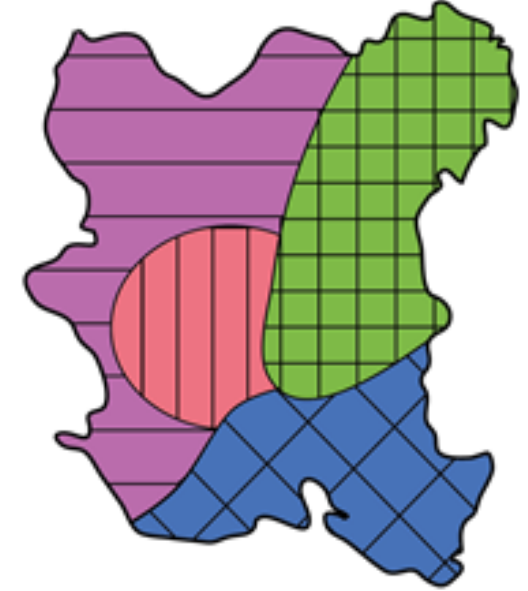

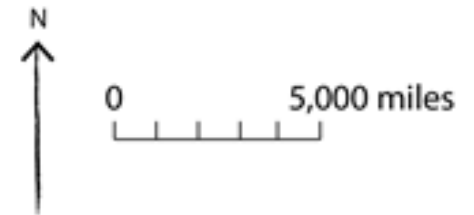

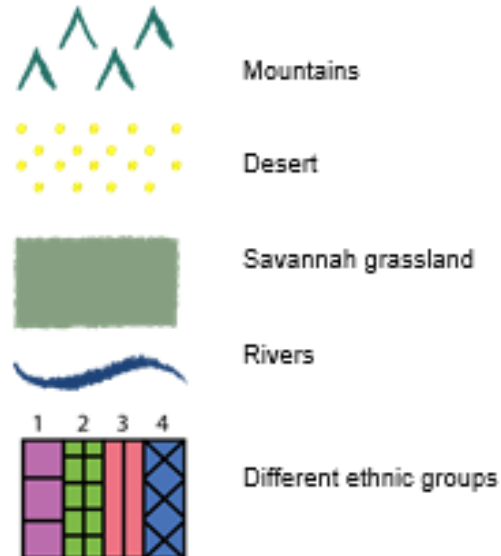

Key Idea: The world political map of sovereign nation-states is dynamic
- Use the information in the maps to determine where you would place borders in the Outline map and draw them
  There are no right or wrong answers!

Changing spaces, making places: A local place

You are going to make a profile of the local area- the school at the centre and a 1 mile radius around it are your limits.

You need to find out and present the following:-

- Demographic profile- numbers of, genders, ages, sex of, ethnicity.
- Socio economic data profile- unemployment, employment, occupations, educational qualifications, types of housing, housing tenure (ownership). Crime data.
- Cultural profile
- Built characteristics- land use, building survey,
- Political characteristics- number of councillors
- Natural characteristics- rivers, relief (height) of land, mountains, lakes, coastal/ inland, biome?
- Connections with other places historically and today- e.g. migration, colonialism, trading
- Changing flows of people and money

Help

◉ **HINT:** look at the census data, deprivation data, contact the local council….

◉ Find crime data at www.police.uk- type in the postcode and search for local crimes that have taken place

◉ Find socio economic data at different levels from the office for national statistics (ONS)

• www.neighbourhoodstatistics.gov.uk

◉ Much data comes from unreliable sources. You need to make sure the data you get is from as reliable a resource as possible so use UN data or the office for national statistic.

◉ Be aware of **bias** that may exist on certain pre- prepared data as often statistics are miss represented to make a point.

◉ When using newspapers to research storylines you must consider the view of the publication. Thus using multiple sources as evidence would be useful.

◉ You must source your data so that its validity can be checked.
